

MODEL: EPOS ELS 3 MINI MONITOR LOUDSPEAKER SYSTEM

The first in a line of lower cost speakers, the ELS 3 mini monitor maintains the high standards expected of any product bearing the Epos name.

Designed not only for high performance two channel operation, these new competitively priced Epos speakers will further satisfy a requirement in the escalating home cinema market, ensuring there is no need to compromise the audio quality in the name of home entertainment.

Utilising a two-way bass reflex design, the ELS 3 incorporates a 130mm woofer together with an all-new Epos designed 25mm aluminium dome neodymium tweeter. Naturally this is a fully shielded system.

In a deviation from the Epos real wood veneer cabinet, this new ELS 3 cabinet features a vinyl wrap finish allowing the cost to be highly competitive. Three choices of finish ensure a perfect match with earlier models and a smooth transition from two channel to home theatre if desired.

As you would expect from the manufacturer of such a well respected brand, this new and exciting Epos ELS 3 has a performance level that simply has to be heard to be believed.

SPECIFICATION

Power Handling:	100 Watt speech and music
Frequency Response:	65 Hz - 20 kHz
Impedance:	4 Ohm nominal
Sensitivity:	87 dB/IW /1m
Amplifier Compatibility:	25 - 100 Watt
Positioning:	20 -50cm (8" - 20") from a rear wall
